

## SARS-CoV-2 Rapid Antigen Test Kit (Colloidal Gold Immunochromatography)

Selfdiagnostics SARS-CoV-2 Rapid Antigen Test Kit identifies current infection during the acute phase of COVID-19, while the virus is still present in large quantities in the respiratory tract (nasopharynx). Similar to laboratory devices, it detects a SARS-CoV-2 antigen, the nucleoprotein. The test provides a qualitative result showing coloured bands indicating the presence of SARS-CoV-2 antigens.

- Enables faster decision making about the patients need to be put in quarantine.
- Allows for screening of individuals at risk of exposure (e.g. healthcare workers).
- Helps to expand the range and quantity of direct virus testing in low infrastructure areas or where laboratory testing is not available.

- Non-invasive
- Easy handling, no devices required
- Result in 15 minutes
- Stable, high accuracy
- Affordable
- Less plastic waste
- Rapid delivery, within 2 weeks

Step 1: Use swab to collect sample.

Step 2: Add 5 drops of buffer to well A.

Step 3: Insert the sample through well B to well A, rotate the shaft clockwise first and counterclockwise, twice each.

Step 4: Peel off the adhesive, fold the left side over, and wait for 15 minutes.

For enquiries about ordering Selfdiagnostics SARS-CoV-2 Rapid Antigen Test Kit, please contact us. We will answer your call immediately and reply to your e-mail within 24 hours.

We can also provide you Selfdiagnostics SARS-CoV-2 IgM/IgG Antibody Assay Kits. More information can be found <http://selfdiagnostics.eu/sars-cov-2-antibody-test>
